

EcoCarrier

EcoCarrier

Ecocarrier is an established OTT, MVNO, MVNE and SuperMVNE with an exceptional rich resource of intellectual properties, engineering and development capability and capacity and experience and knowledge in the telecom service provision space and (micro) money remittance space.

We provide best-of-breed technologies and best-of-class services as managed services through a network of resellers worldwide to have them made the services readily available to Migrant Workers - including expatriates, the Unbanked and the travelers that go mobile roaming in international travels.

To be a reseller of our truly comprehensive managed services, all you need to be able to do is TO SELL, everything else is WELL DONE by Ecocarrier and is READY TO GO.

We seek cooperation with companies or individuals in any country who are properly positioned and motivated to build an enterprise to promote, distribute and/or resell our products and services in their countries or market areas.

We offer the fastest track to market and positive cash flow without risk or the need to make capital investment in plant and equipment.

Mission Statement

To design, develop, build, maintain and support truly comprehensive managed services that incorporate the best-of-breeds technologies and best-of-class services to enable retail service provision facility/operation to be readily and easily set up for service distribution in any country and any market, by companies who have established distribution network or individuals who are motivated entrepreneurs, to offer services to the consumer public – services that are useful and important and in great demand for meeting the need for affordable means of wire-line, wireless and mobile voice data and text communication.

Managed Services as business proposition lend themselves to being available and amenable to companies or individuals, who are otherwise not equipped with the know-how or the wherewithal for organizing and supporting a high-tech telecom service provision business, to become resellers and providers of reliable high quality features-rich telecom services in markets and countries where they have established or able to establish an effective/efficient distribution network. This is Ecocarrier's modus operandi for business propagation in global markets. Please click to view video presentation

Vision Statement

The problems of strife among nations are the result of distrusts among the peoples and the perceived social inequality. Communications, telecommunications, chief among them, are the best ways to dispel suspicion and to resolve misunderstanding. Telecommunication is needed to foster an economy and to raise the standard of living of people and to level the playing fields for the masses.

Ecocarrier has the vision of playing its part towards achieving the above-stated objectives – maybe slowly but surely.

Largest Airtime
**Top-Up/
 Recharge**
 Coverage for
90⁺ Countries
300⁺ MNOs

OUTSTANDING!

Complete Managed Services for
Airtime Credit Transfer
 for Top-Up / Recharge of
 Prepaid Mobile Subscriber Account

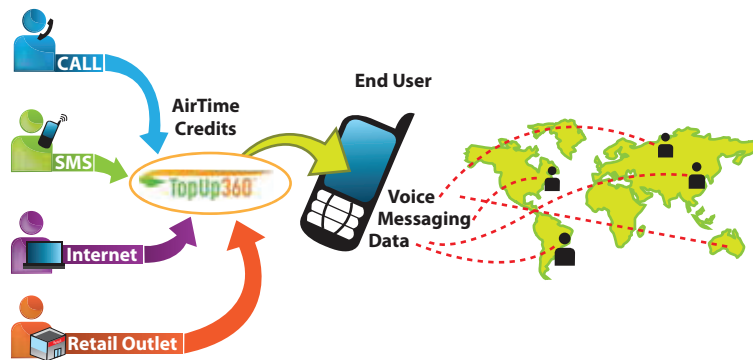

Multiple Modes of Distribution at:

- Point of Sales person-to-person at retail outlets
- Check-out cash register where PIN is delivered electronically in real time and on receipt print-out
- Retail outlets in the form of Gift-to-Call Cards (scratch cards)
- On-line at www.topup360.com or reseller's website (private-labeled production of the TopUp360 service)
- Strategic partner's own service platform – by integration with TopUp360 service platform through API

Multiple Ways of buying and sending Airtime Top-Up / Recharge by the End User

- **On-line at www.topup360.com** or reseller's private labeled version of it to buy a PIN with certain amount of credit associated with it and send portions of the credit to various Prepaid Mobile Subscriber Accounts
- **On-line at <http://agent.ecocarrier.com>** or reseller's private labeled version of it to buy and send discrete amount of credit to a Prepaid Mobile Subscriber Account
- By using a purchased PIN and sending a **SMS message** to TopUp360 service platform to instruct it to send a part or all of the remainder amount of credit associated with the PIN to a Prepaid Mobile Subscriber Account in format:
 70#<PIN>#<AirTime Credit Transfer amount in \$ to send>
 #<Mobile Telephone Number including country code>
 e.g. 70#8967453256#10#8613590289153
- By using a purchased PIN and dialing up a local access number to reach an IVR system and interact with the IVR system to place request to send a part or all of the remainder amount of credit associated with the PIN to a Prepaid Mobile Subscriber Account

4 EASY WAYS TO TOP UP

Best Value Top-Up Service to the End User

TopUp360 service platform is implemented with capability and capacity of relationships with many aggregators and MNOs to be able to always provide the Best Value routing for fulfilling top-up / recharge request made by the End User.

Best Profit Margin for the Master Reseller / Reseller / Sales Agent

Overall profit margin (discount) of up to 14% to be shared among Master Reseller / Reseller / Sales Agent, while maintaining the best value offer to the End User.
