MAIN FEATURES

RoamFone is high quality dual-SIM or triple-SIM GSM mobile handset that is equipped with SuperSIM (www.supersim/mobi) and/or ShuttleSIM (www.shuttlesim.net) that are supported by GSM roaming agreement with some 500 mobile operators in 200 countries worldwide including all the countries that one would want to visit either on business or leisure travels.

RoamFone Rental Service addresses a market niche in ways that result in great benefits to all parties concerned: the End User (Service Subscriber), the Travel Agent, the Master Travel Agent and the Service Provider (Ecocarrier); there is sufficient profit margin to allow for a fair and attractive sharing of the profits in the food chain.

Complete on-line operation that requires little or no special training/learning on the part of the Travel Agent. www.roamfonerental.com enables all the operations covering opening a rental contract, invoicing, credit top up, final billing, closing of a rental contract and payment processing etc. to be performed on-line by the Travel Agent by making keystrokes into the Roamfone Rental Program software.

Complete Management Facility is available to the Master Travel and/or the Master Reseller on line for obtaining Call Data, Billing Data, Account Information in a highly efficient manner for administration and management purposes.

No investment in system hardware and little or no investment in RoamFone (depending on the business arrangement between Ecocarrier and the Travel Agent). Ordinarily, the Travel Agent needs only to have the use a PC installed with a browser (Internet Explorer).

High quality reliable call termination service. All calls are switched and routed through premium service routes. Ecocarrier is a Canadian licensed operator for international telephone service provision to resellers of Ecocarrier's managed (retail) services in more than 75 countries worldwide and to carriers for wholesale call termination services, Currently Ecocarrier handles more than 40 million minutes of call traffic monthly.
