MRESENCE™

Presence in Mixed Reality

MRESENCE: parties, physically separated over long distance, to interact with one another in ways that achieve in Mixed Reality the experience of

- See what I see
- Touch what I touch
- Empathy over cyberspace

in one-to-one / one-to-many / many-to-one / many-to-many configurations

MRESENCE overcomes distance and physical separation, facilitates the provision of crowd-sourced help and expertise in a sharing economy in a convenient and affordable way.

MRESENCE greatly reduces the cost of service provision by eliminating the need of transportation. MRESENCE greatly enhances availability of expertise for and the productivity of work operations.

Cloud-based managed services for applications in

CollaboMRation – collaboration in Mixed Reality for field engineering and technical support work
TeleMRedicine – telemedicine in Mixed Reality
ConfeMRence – conference in Mixed Reality among family and friends or in business
MRearning – on-line distance learning in Mixed Reality

Operate with readily available providers of required expertise, professional advice through global crowd-sourcing in a subscription or per-per-use service arrangement.

QiiQ VR™
www.qiiq-vr.com

You can use VIVE-AR, a web tool that allows users without programming experience to create AR production.

You can use QiiQ-VR to create VR projects based on 360 images or videos. You can link 360 images and videos together to create a 360 scene in which the user/viewer can look around or into which they can "tour".

It is simple and easy to use and IT IS FREE

PizzzAR™
www.pizzzar.com

PizzzAR is a high efficacy and super cost efficient digital medium for advertisement and promotion campaigns. It features AR/VR/MR Production, location-aware function, view data capture and big data analytics in a comprehensive cloud-based managed service provision.

PizzzAR provides Mobile Digital Enhancement to Traditional Printed Advertisement.

HOW DOES IT WORK?

- As the advertiser, add a QR/AR code on your printed advertisement (flyer, advertisement tabloid issue, etc.)
- The user/viewer first needs to download and install the PizzzAR App into his/her smartphone or tablet
- The user/viewer then simply points the camera of his/her smartphone or tablet at the image (or Marker) to trigger/play the AR Production.
- By pointing the smartphone's camera at the image on the printed ads, the viewer can play a video, see more pages of texts and images, access a website, listen to audios or get an incentive such as discount vouchers, etc
